

Global Hosting Outsource Solution

Offer a comprehensive portfolio of server hosting solutions backed by the NTT Communications Global IP Network, tailored to meet each client's needs.

Hosting Outsource Solution on Global Tier 1 Network

NTT Communications offers the business opportunity of providing a state-of-the-art dedicated and shared hosting services platform directly connected to our high-speed global Tier 1 network.

Our reseller and OEM programs are designed for our partners, such as carriers, ISPs and web hosting providers, to generate new revenue streams with minimal start-up costs by outsourcing server operations to reduce total costs.

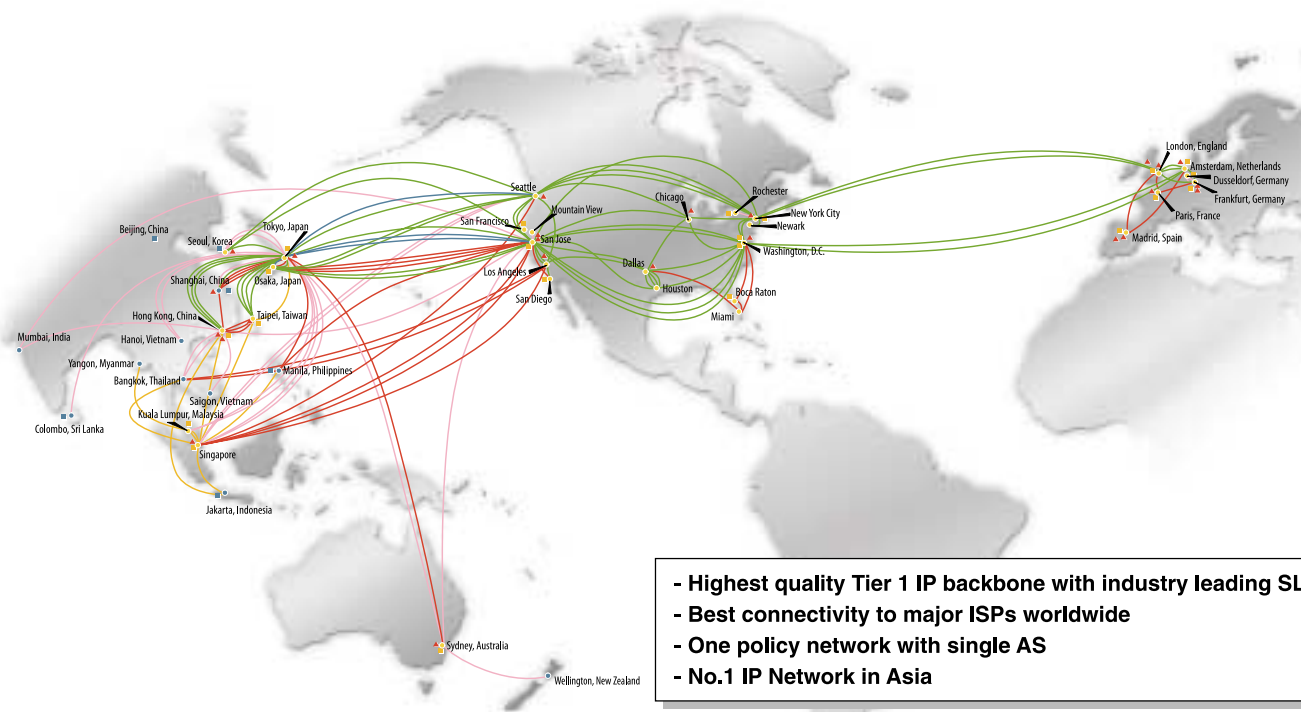

Our Partners enjoy:

- Selling the world leading and state-of-the-art hosting services without infrastructure investment.
- 24/7 monitoring system ensuring stability of services.
- Comprehensive 24/7 technical support for our partners.
- Customer management tools enabling you to manage your customers in real time.
- Private label opportunity using our branding tools.
- Additional volume-based product discounts that grow with your business.

When you consider NTT Com Global IP Network strength and all of the benefits we offer partners, it is no wonder that over thousands of Internet professionals around the world trust us to power their clients.

NTT Communications Global IP Network

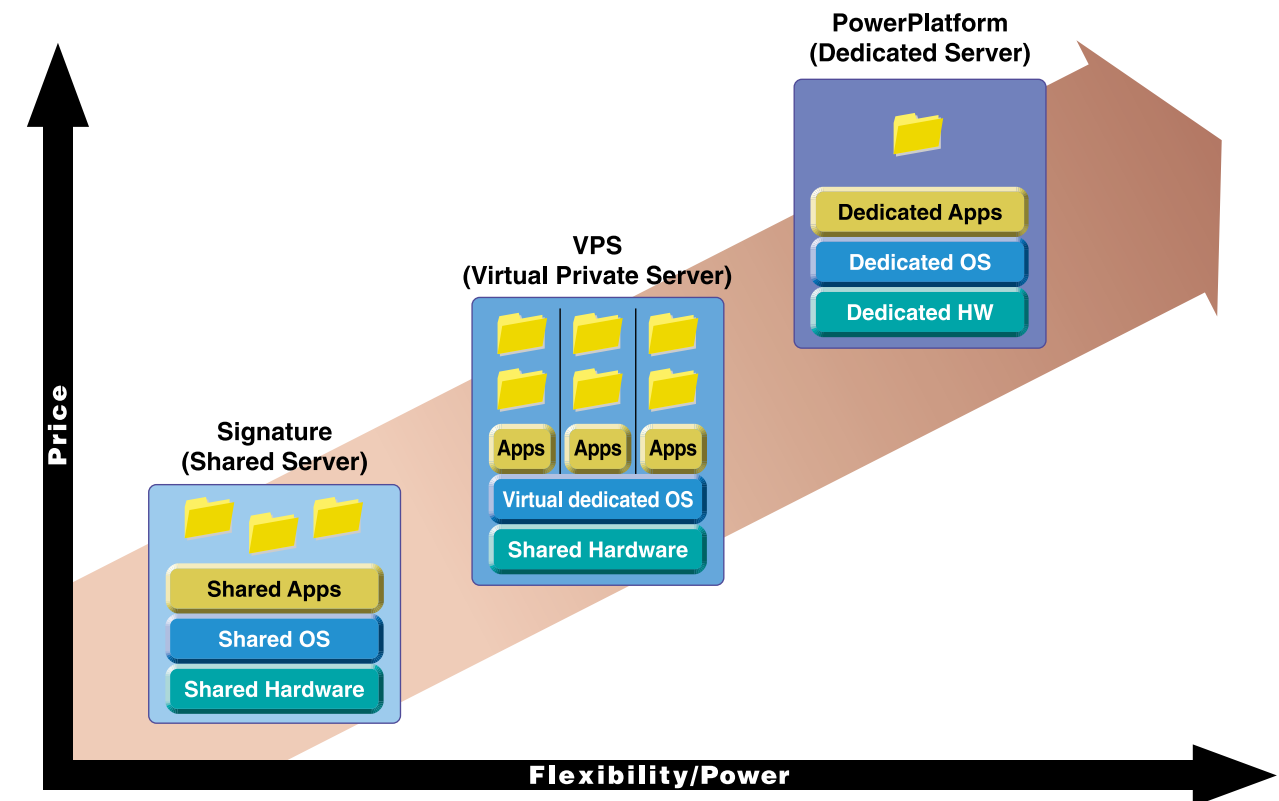

- Highest quality Tier 1 IP backbone with industry leading SLA
- Best connectivity to major ISPs worldwide
- One policy network with single AS
- No.1 IP Network in Asia

As of September 2005. For the latest network map, please see www.ntt.net/about/
